Note: Prices reflect the difficulty of obtaining new stock that is true. "Nobody knows the trouble I've seen" in that respect—mostly to the enrichment of our compost heap! Some 60% of new stock from various sources proves to consist of inferior substitutes, obvious seedlings and all sorts of mix-ups. Some of the mistakes, however, have been too fine to discard and still grace garden and vase—probably named varieties but so far unidentified. Perhaps you might like to enjoy them, too. Six kinds labelled as to color, per set, \$2.00
